within-species ρ median 0.27
(+10/−3 species)
Type-specific share of squared log2FC
Drought intensity (RMS population log2FC)
within-species ρ median 0.54
(+13/−0 species)
CV of cell-type gains
Drought intensity (RMS population log2FC)
within-species ρ median 0.55
(+5/−0 species)
Fraction of responding cell types (RMS ≥ 0.5)
Drought intensity (RMS population log2F
mild
moderate
severe
Program score (rel.)
ABA signaling
Water deprivation
Osmotic adjustment
ROS scavenging
Photosynthesis
Translation/ribosome
Cell wall
Aquaporin/water transport (0+/3−)
Wax/cuticle (1+/1−)
JA response (3+/0−)
Auxin response (0+/0−)
Cell wall (0+/5−)
Cell cycle (1+/5−)
Translation/ribosome (0+/5−)
Photosynthesis (1+/6−)
ROS scavenging (3+/0−)
Stomatal movement (1+/0−)
Osmotic adjustment (5+/0−)
Water deprivation (6+/0−)
ABA signaling (7+/0−)
