
Arabidopsis leaf
response to water deprivation
response to water
S-glycoside catabolic process
external encapsulating structure organization
ribosome biogenesis
translation
photosynthesis, light reaction
response to red or far red light
phenylpropanoid biosynthetic process
phenylpropanoid metabolic process
response to heat
response to hydrogen peroxide
photosynthesis
glucosinolate metabolic process
photosynthesis, light harvesting in photosystem I
photosynthesis, light harvesting
positive gravitropism
phloem or xylem histogenesis
cell wall organization
plant-type cell wall organization
RNA modification
secondary metabolic process
core (shared)
bundle sheath
companion cell
epidermis
guard cell
meristematic
mesophyll
phloem
Arabidopsis root
response to water deprivation
response to water
response to chitin
response to nitrogen compound
response to light intensity
jasmonic acid metabolic process
anther development
glucosinolate catabolic process
S-glycoside catabolic process
secondary metabolic process
phenylpropanoid biosynthetic process
response to cold
photosynthesis
photosynthesis, light reaction
ribosomal large subunit biogenesis
ribosome biogenesis
cellular response to nutrient levels
seed development
secondary metabolite biosynthetic process
response to starvation
negative regulation of catalytic activity
response to fungus
response to bacterium
cell cycle
microtubule-based movement
inorganic anion transport
monoatomic ion transport
vascular transport
phloem transport
defense response to fungus
positive regulation of defense response to bacterium
positive regulation of response to biotic stimulus
core (shared)
cortex
endodermis
meristematic
pericycle
phloem
procambium
root cap
root epidermis
root hair
vascular
xylem
padj 1e-2
padj 1e-5
padj ≤ 1e-10
up (core) / relatively up (cell type)
down (core) / relatively down (cell type)
