Core shared up-regulated genes
response to water deprivation
response to water
cellular response to acid chemical
regulation of cellular response to alcohol
regulation of abscisic acid-activated signali
response to oxidative stress
regulation of response to alcohol
response to heat
response to alcohol
response to antibiotic
response to hydrogen peroxide
response to abscisic acid
response to toxic substance
response to cold
response to reactive oxygen species

Species with q < 0.05
Core shared down-regulated genes
photosynthesis
photosynthesis, light reaction
generation of precursor metabolites and energ
carbohydrate biosynthetic process
response to cytokinin
cellulose metabolic process
beta-glucan metabolic process
polysaccharide metabolic process
beta-glucan biosynthetic process
chromosome organization
cell wall organization or biogenesis
photosynthesis, light harvesting
plant-type cell wall organization or biogenes
plant-type cell wall organization
cellulose biosynthetic process
