
Up: 3,189
Down: 2,252
Markers: 3,186
-log10 BH q (cap 50)
log2 FC (type / rest)
mitochondrial envelope
mitochondrial membrane
membrane protein complex
inner mitochondrial membrane protein complex
mitochondrial inner membrane
mitochondrial protein-containing complex
GO fold enrichment
-log10 q (cap 20)
Oxidative phosphorylation
N-Glycan biosynthesis
Endocrine and other factor-regulated calcium reabsorption
Citrate cycle (TCA cycle)
Epithelial cell signaling in Helicobacter pylori infection
Synaptic vesicle cycle
KEGG fold enrichment
-log10 q (cap 20)
